

A beautiful smile gives you confidence and that confidence is seen by others. Regardless of your choice of treatment, treatment itself will change your life for the better. Whether it is the self-assurance that comes with a great smile or the improved health that comes with a perfect bite, orthodontic treatment is a great investment in yourself.

Confidence.

Invisible braces

Introducing Radiance, the fast and reliable way to invisibly straighten your teeth. Radiance has changed the face of braces forever. Now you can live your life while getting **the smile you have always wanted**. Gone are the days of traditional metal braces as your only option for orthodontic care. Today, only clear ceramics balance your doctor's need for tooth control and your need for a professional appearance.

Early ceramics were clouded and failed to deliver on the promise of a clear smile. Radiance is different.

Every Radiance bracket is a polished jewel, made from pure grown sapphire, second only to diamond as the toughest mineral known to exist. Each crystal is honed and then heat polished into a superbly smooth, incredibly clear, and astoundingly strong bracket.

Invisibly straighten your teeth with the confidence that can only come from Radiance pure sapphire brackets. Ask your doctor to show you the amazing Radiance brackets and make an investment in yourself today!

Live life while straightening your teeth

"What is the best treatment for me?"

Unlike plastic removable aligners, clear sapphire braces are proven to be as effective as metal braces in correcting tooth alignment, even in advanced cases.

"Oh no, I left my aligners at the restaurant!"

Lost or damaged aligners are expensive to replace and cost you valuable treatment time. Plus, removing aligners at meals can be a very public act.

"What do you mean reboot?"

Sometimes aligners simply do not work. With aligners, "reboots", or taking a new set of impressions to create all new aligners, are extremely common and can greatly lengthen your already extended treatment time.

Most patients want the same things from their orthodontist: a fast, discreet, and proven way to create a beautiful smile. Radiance is the most state of the art solution available today. So live your life and bask in the confidence of getting the best possible treatment, invisibly, with spectacular results.
